

*Mertensia lanceolata* (Bluebells)  
Boraginaceae (Forget-Me-Not Family)  
Foothills to alpine. Woodlands, meadows, openings.  
Spring, summer.

*Oreocarya virgata* or *Cryptantha virgata* (Miner's  
Candle)  
Family: Boraginaceae (Borage)

*Oreocarya virgata* or *Cryptantha virgata* (Miner's  
Candle)  
Family: Boraginaceae (Borage)

*Lithospermum multiflorum* (Puccoon)  
Boraginaceae (Forget-Me-Not Family)  
Clumpy growth pattern, shorter tube than *L. incisum*

*Lithospermum incisum* (Narrowleaf Puccoon) Family:  
Boraginaceae (Borage)

*Eriogonum umbellatum* (Sulphur Flower)  
Family: Polygonaceae (Buckwheat)  
Flowers long lasting; dry with shades of red

*Eriogonum umbellatum* (Sulphur Flower)  
Family: Polygonaceae (Buckwheat)  
Flowers long lasting; dry with shades of red

*Pulsatilla ludoviciana* (Pasqueflower)  
Ranunculaceae (Buttercup)

*Cerastium strictum* (Mouse-ear chickweed)  
Alsiniaceae (Chickweed Family)  
Only chickweed where the sepals are much shorter  
than the petals.  
Foothills and montane.

*Cerastium strictum* (Mouse-ear chickweed)  
 Alsiniaceae (Chickweed Family)  
 Only chickweed where the sepals are much shorter  
 than the petals.  
 Foothills and montane.

*Oenothera caespitosa* (Tufted Evening Primrose)  
 Family: Onagraceae (Evening Primrose). Large  
 flowers, low to the ground.

*Oenothera caespitosa* (Tufted Evening Primrose)  
 Family: Onagraceae (Evening Primrose). Large  
 flowers, low to the ground.

*Toxicoscordion venenosum* (Death Camas) Family:  
 Melanthiaceae (False Hellebore) All parts of the plant  
 are poisonous to both livestock and humans; Navajo  
 used it to treat coyote bites.

*Toxicoscordion venenosum* (Death Camas) Family:  
 Melanthiaceae (False Hellebore)

*Penstemon virens* (Bluemist Penstemon)  
 Family: Scrophulariaceae (Figwort)

*Penstemon virens* (Bluemist Penstemon) Family:  
 Scrophulariaceae (Figwort)

*Penstemon virens* (Bluemist Penstemon)  
 Family: Scrophulariaceae (Figwort) Common; grows  
 on rocky areas; flowers grow all around the stem

Blue Flax  
*Adenolinum lewisii* or *Linum lewisii*.  
 Linaceae (Flax family)

Blue Flax  
*Adenolinum lewisii*. *Linum lewisii*.  
 Linaceae (Flax Family)  
 Tall, slender stems with many buds. Only one opens  
 each day.

Redstem Filaree or Stork's Bill.  
*Erodium cicutarium*.  
 Geraniaceae (Geranium family).

*Geranium caespitosum* (Parry Geranium)  
 Family: Geraniaceae (Geranium)

Parry Geranium (*Geranium caespitosum*)  
 Family: Geraniaceae (Geranium)

*Ribes cereum*. Synonym: *Ribes inebrians*. (Currant)  
 Grossulariaceae (Gooseberry Family)  
 Foothills, montane, subalpine. Woodlands, canyons,  
 rocky areas. Spring.

*Iris missouriensis* (Wild Iris) Family: Iridaceae (Iris)

*Leucocrinum montanum* (Mountain sandlily)  
 Liliaceae (Lily Family)

Skullcap (*Scutellaria brittonii*)  
 Family: Lamiaceae (Mint)  
 Hint: obvious white teeth chew off hair . . .

Skullcap (*Scutellaria brittonii*)  
 Family: Lamiaceae (Mint)

Monarda fistulosa (Beebalm)  
Family: Lamiaceae (Mint)  
Coulson Gulch June 21 2009

Draba. MUSTARD OR BASSICACEAE FAMILY.

Draba. MUSTARD OR BASSICACEAE FAMILY

Alyssum parviflorum or Alyssum minus  
(Small-flowered Alyssum) Family:  
Brassicaceae  
(Mustard)

Alyssum parviflorum or Alyssum minus (Small-flowered  
Alyssum) Family: Brassicaceae (Mustard)

Mountain tansy mustard (Descurainia richardsonii)  
Mustard family or Brassicaceae

Wallflower (Erysimum capitatum). Mustard family  
(Brassicaceae). ID: Simple leaves; large flowers (over  
1 cm); four petals, four sepals, six stamens (4+2);  
superior ovary.

Erysimum capitatum (Western Wallflower)  
Family: Brassicaceae (Mustard)  
Four petals in a cross; six stamens (4+2)

Aletes tenuifolius or Musineon tenuifolium (Slender  
Wildparsley)  
Apiaceae (Parsley family)

*Aletes tenuifolius* or *Musineon tenuifolium* (Slender Wildparsley)  
Apiaceae (Parsley family)

*Thermopsis* ssp (Golden Banner)  
Fabaceae (Pea Family)  
Species identified by pea pod

*Thermopsis* ssp (Golden Banner)  
Fabaceae (Pea Family)  
Species identified by pea pod

American vetch  
*Vicia americana*  
Pea family

*Astragalus* sp. Family: Pea or Fabaceae

*Astragalus flexuosus* (Wiry Milkvetch)  
Family: Fabaceae (Pea)

*Oxytropis lambertii* (Lambert's Locoweed) Family:  
Fabaceae (Pea) Plant seems to have different forms.

*Oxytropis lambertii* (Lambert's Locoweed) Family:  
Fabaceae (Pea) Plant seems to have different forms.

*Oxytropis lambertii* (Lambert's Locoweed)  
Family: Fabaceae (Pea)

Medicago lupulina (Black Medic) Family: Fabaceae (Pea)

Medicago lupulina (Black Medic) Family: Fabaceae (Pea) Small plant, fairly low to the ground

Rubus parviflorus. (Thimbleberry) Rosaceae (Rose Family) Montane, subalpine. Woodlands, disturbed areas. Spring, summer. Leaves have three lobes.

Rubus parviflorus. (Thimbleberry) Rosaceae (Rose Family) Montane, subalpine. Woodlands, disturbed areas. Spring, summer. Leaves have three lobes.

Potentilla pulcherrima (Beautiful Cinquefoil) Rosaceae (Rose Family)

Potentilla pulcherrima (Beautiful Cinquefoil) Rosaceae (Rose Family)

Rhus aromatica or Rhus trilobata (Threeleaf sumac) Anacardiaceae (Sumac Family)

Rhus aromatica or Rhus trilobata (Threeleaf sumac) Anacardiaceae (Sumac Family)

Erigeron colomexicanus, Erigeron divergens variety cinereus. Erigeron tracyi. Asteraceae (Sunflower Family) Foothills. Openings, woods. Spring.

Tragopogon dubius (Yellow Salsify)  
Asteraceae (Sunflower)  
Phyllaries extend beyond flower

Senecio sp. Aster or Asteraceae family.

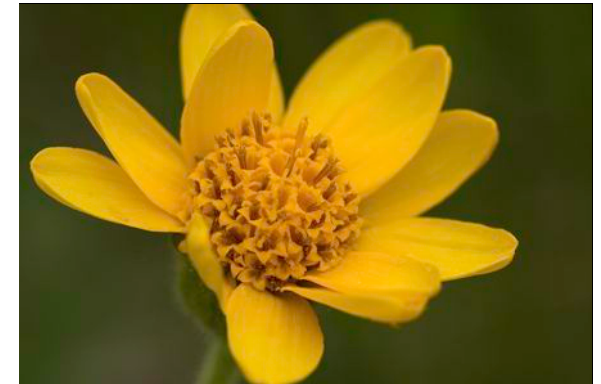

Arnica fulgens (Foothill Arnica) Family: Asteraceae (Sunflower) Common in meadows and rocky slopes; follow the sun; opposite leaves with parallel veins; hairy bracts with purplish tips

Woolly Groundsel (Packera cana) Aster Family (Asteraceae)

Arnica fulgens (Foothill Arnica) Family: Asteraceae (Sunflower) Common in meadows and rocky slopes; follow the sun; opposite leaves with parallel veins; hairy bracts with purplish tips

Arnica fulgens (Foothill Arnica) Family: Asteraceae (Sunflower)

Phacelia heterophylla (Scorpionweed) Family: Hydrophyllaceae (Waterleaf)

Phacelia heterophylla (Scorpionweed) Family: Hydrophyllaceae (Waterleaf)

Antennaria parvifolia (Small-leaf Pussytoes) Family: Asteraceae (Sunflower) Mat-forming; leaves hairy on both sides; no pink in flowers; male and female plants separate
